THE POUND STERLING.
A correspondent of the New York Journal of Commerce states the following data from which to calculate the value of pound sterling:

In England 22 ounces of pure gold is mixed with 2 ounces of alloy, this is called 22 carate fine, and is valued at £3 11s 10d.

In the United States 90 ounces of pure gold is mixed with 10 ounces of alloy of the value. 100 ounces of coin is worth \$186.46; an ounce of coin is \$18.60.

One ounce of pure gold, 1,000 fine, coined into £20.67 18-100.

A sovereign of England (new weight) is worth \$10.40.

By the above statement you may conceive the intrinsic value of a sovereign or pound note. By the help of a little arithmetic you will find that a pound sterling is £4 863 s. and a little over.

Less one hundred years since one sovereign of the States passed a law that any one who owned 25 shillings should be allowed to wear it with a guinea, which was called 21 shillings and weighed 5 dwts. 9 grains.

Since then the British mint had changed the coinage, made sovereigns of 20 shillings and 21 sovereigns to go for 20 guineas.

These sovereigns contain more pure gold than 20 guineas and are of the same intrinsic value.

The United States (1840) had a gold coin with a value on the face of 20 shillings.

6 grains in 11-12 fine, at \$10; they were then more valuable than silver. In 1834 Congress made them a tender for \$10 and made a new coinage with the hair of an eagle, 9-10 fine, which are the eagles that we now talk about, but do not often see. The value of the change of the coinage of the United States may be seen by the following: The old called \$4.44, and now \$4.84 and \$4.94. The new pounds are worth \$4.86 38-100, if worn.

The habit is still to call the pound \$4.44, and then add 91 per cent., which brings it up \$4.85 for a pound. By this inaccuracy of calling the pound one sum, and estimating it at another, the contradiction is made, that exchange between England and the United States is 100 per cent.

it is not equal to the premium
in favor of England.—*Richmond Examiner*

THE SCHOOL QUESTION

(From the *Brookline Record*.)

The discussion of the school question has more been opened up. It is said that delegates to England are prepared to recommend alterations in the existing school law in favor of Roman Catholics. The discussion is getting hot, the *Globe* beating the *Post* in this. All this is very bad. From the beginning we maintained that the ministry were without principle. The coalition was formed to settle the Clergy's service question—the *Globe* knows how it was settled. The present coalition

formed or Co-federation. This matter, too, will be carried, but the result will be as little to the interests of the country as the passage of the Clergy Reserve Bill. Glasgow may be kept quiet, and the Glasgow Association may be kept quiet, but the Confederation will not be kept quiet. Cartier, he need not inquire at the moment in which they intend carrying it out. They are prepared for anything, even to be John A. going hot for annexation or Federation, seeing he paid so much attention to the Fenian Correspondent of the *World* at Kingston dinner. Of course if John takes up annexation, all his toadies will go with him. The great trouble is that the Confederation was formed in 1849, and when Mr. Cameron, the Orange Co. Master, proposed to run the Lower

The influx of gold to the United States has continued on a somewhat larger scale.

that had been looked for, and the amount of the loss was small. After the receipt of the money, after a month or two back, it is not too much to return some two hundred thousand or three hundred thousand pounds in three or successive weeks. The most satisfactory feature in the movement is the evidence that it shows in the permanent peace in America, and that as far as investors are concerned, the removal of civil war is considered in the highest degree remote.

We have already had occasion to observe that this belief is not only felt by Englishmen and Germans, but has lately been shared by Frenchmen. The Five Great Powers, which these shipping companies represent, are not now in any

pay for the purchase of French securities in London or France. Not very many years ago foreign securities were quoted on the French Bourse, and it is significant to note how great an alteration has taken place in this respect. Except on our State bonds, it may be doubted whether there is any longer a market for them, not even in France. In the United States, foreign investment is so largely held as in Paris. Formerly, capitalists would take nothing but Renten; now they are ready to invest in Italian, Spanish, Mexican (unfortunately in many cases) and other securities. Even in the United States, however, in rare instances, the bonds of foreign governments are sold, and the significance of the present demand for them is apparent.
